Is proud to present the reengineered

Sidemount

Rejuvenates back end motors for the 8270 Pinspotters

All parts for installation included

The "*Sidemount*" eliminates **COSTLY** backend motor problems for AMF PINSPOTTERS. The "*Sidemount*" back end motor kit greatly enhances performance while providing prolonged Stator life. The "*Sidemount*" keeps the motor out of the line of fire and will eliminate all the damage problems from pins hitting the motor which can cause damage to the motor plug, capacitor cover, pin damage, or knocking the motor head out of alignment. These are costly problems that can be prevented and will not happen with the "*Sidemount*". The kit is available for both National and GE/Westinghouse
